FM NPIC 22 52 Z 25X1 ZEM 25X1 TOPSECRET TITTE RUFF CITE NPIC 6024. CONTINUING ANALYSIS OF MISSION 1050 REVEALS THAT A MODIFICATION IS UNDERWAY AT SECOND GENERATION TRY ADDS BUILDINGS AT MOSCOW ABM LAUNCH COMPLEXES ED5-1, E24-1, AND E33-1, AND POSSIBLY AT E31-1. THESE ARE THE FOUR ACTIVE ABM COMPLEXES DEPLOYED AROUND MOSCOW. AT 205-1, E24-1, AND 233-1, THE MODIFICATION CONSISTS OF CONSTRUCTION OF A SINGLE WING EXTENDING FROM ONE SIDE OF BUILDING A OF TRY ADDS 2. AT EACH OF THESE COMPLEXES THE NEW WING IS ON SAME SIDE OF THE BUILDING. AT E31-1, A WING IS POSSIBLY UNDER CONSTRUCTION ON THE SIDE OF BUILDING A, TRY ADDS 1, BUT IN THE SAME RELATIVE POSITION AS AT THE OTHER THREE COMPLEXES. AT COMPLEX E24-1, THE WING MEASURES APPROXIMATELY 95 BY 75 FEET. OFFICE CABLE THIS TYPE OF MODIFICATION OF BUILDING A IS REMINISCENT OF SECUR THE CONSTRUCTION UNDERWAY AT LAUNCH COMPLEX D, SARY-SHAGAN MISSILE TEST CENTER. THE DIFFERENCE AT THE MOSCOW COMPLEXES, HOWEVER, LIES IN THE FACT THAT THE WING IS PRESENTLY ONLY ON DNE SIDE OF THE TRY ADDS BUILDING, AND THAT IT IS TOWARD THE OPPOSITE END OF THE BUILDING. CONSTRUCTION OF THE WINGS AT THE MOSCOW TRY ADDS IS FIRST OBSERVED IN MARCH 1969 THERE WAS NO EVIDENCE OF THIS CONSTRUCTION AT E33-1 IN AUGUST 1968, AT EØ5-1 AND E24-1 IN NOVEMBER 1968, AND PROD AT E31-1 IN JANUARY 1969. 25X1 _ 25X1 GP-1
